AGRICULTURAL FORECASTS JULY 2007

DROP IN CEREAL PRODUCTION

On 31 July, early estimates point to a decline in grain cereals production. The Spring crops show, due to the low temperature and the lack of sun hours, a short growth delay, a decrease will be expected in their yield. The same trend will be followed by orchards and vineyards.

Tema – Referência temporal

Portugal welcomes in August 2007 one of the most important statistics world-wide congress: the 56th Session of the *Internacional Statistical Institute (ISI 2007)*.
